Re: Letter of support for Northern Dynasty Pebble project

To whom it may concern:

The Twin Hills Native Corporation supports the diversification of opportunities for our young people within the region. After several years of economic hardships caused by poor fishing seasons and the cost of living increases for everything, All opportunities to bring jobs into our area needs careful and serious consideration.

Our young people need options to keep them in the region. An opportunity that is not too dependant on one resource and certainly not welfare. Every opportunity to relieve the high cost of transportation of residents and goods and utility services to our area needs to be seriously looked into.

We support Northern Dynasty Pebble project in bringing an opportunity for our young people to get jobs. It is not an easy task for our leaders to support something that could have real adverse effect on our region, but, when it is done responsibly with the amount of public input and expert consultants have been involved, we feel it will be done responsibly.

The collective knowledge that is being tapped into will be able to come up with the safest way of extracting this mineral resource. Northern Dynasty has been forthright and is making every attempt to educate all of us, and has been utilizing all pertinent experts in making this venture safe. They have gone the extra mile.

The alternative is to see our educated young people leaving our areas for opportunities that fishing cannot provide, young families depending on welfare increasing and what ever social shortfalls that result from low income becoming more prevalent in our area.

Sincerely,  
TWIN HILLS NATIVE CORPORATION

John Sharp  
President
