

# A Partnership for all Alaskans

## The Pebble Partnership's Five Core Principles:

- 1 Pebble must benefit people—Pebble is for all Alaskans**
- 2** Pebble must coexist with healthy fish, wildlife and other valued natural resources
- 3** Pebble must apply the world's best and most advanced science
- 4** Pebble must help build sustainable communities
- 5** At Pebble, we must listen before we act

Alaska's natural resources are among the greatest in the world. This includes mineral resources—like Pebble—with potential to benefit every Alaskan for generations to come.

The Pebble Partnership is an Alaska-based company. Thousands of Alaskan men and women will be needed to build and operate the Pebble mine as well as thousands more working in supply and service industries.

Pebble is on state land designated for mineral development. The billions of dollars in royalties and other taxes we will pay will touch every citizen—strengthening health care, education, infrastructure and even the Permanent Fund.

The Pebble Partnership agrees: every Alaskan must benefit from the development of this incredible resource. That's what partnership is all about.

**“Pebble will be an investment of between \$3 and \$5 billion, and it stands to bring massive economic benefits that will be shared by all Alaskans.”**

—Cynthia Carroll, CEO of Anglo American plc, one of two progressive mining companies of The Pebble Partnership

**Log on**—we would like to hear from you.
